Mr. Capps:

Recommend approval with your digital signature for a Certificate of  
Networthiness (CoN) for Army Gold Master version 6.2.

NETCOM/ESTA/OSC&I/IPD has requested this Certificate of Networthiness for a  
full Certificate of Networthiness, Level 3, for the Army Gold Master  
software baseline, version 6.2.

Army Gold Master (AGM), version 6.2, consists of multiple software  
applications that form the baseline configuration for the entire Army  
platform. AGM version 6.2 introduces Internet Explorer 7.0 and Firefox 2.0  
as optional web browsers. Use of these web browsers must be in accordance  
with the Internet Explorer 7.0 Deployment Guidance and the Firefox Security  
Settings Guidance provided.

A full Certificate of Networthiness, Level 3, is the result of reviewing the  
available documentation provided, to include Gold Disk scans, Group Policy  
Settings, security baseline, analysis and capabilities, and security patch  
MS07-010.

This approval is valid only if the AGM version 6.2 tools are implemented  
according to the specified configuration outlined in the Army Gold Master  
Policy Settings and provided on the Army Gold Master Knowledge Center. The  
AGM version 6.2 will be added to the OIA&C Approved Products List. Any  
changes that alter the applications' security posture or configuration may  
invalidate this certificate.

The NETCOM POC is Ms. Kathy Laymon, 520-538-0295, e-mail  
Kathy.laymon@us.army.mil.
