Caveats: NONE

Mr. Capps:

Recommend approval with your digital signature a Certificate of Networthiness (CoN) for Microsoft Office Visio Professional 2003. This is a Commercial off the Shelf (COTS) product.

The Headquarters Information Systems Engineering Command (HQISEC) has requested this Certificate of Networthiness for the Microsoft Office Visio Professional 2003 application, a product of Microsoft Corporation.

Microsoft Office Visio Professional 2003 is a diagramming application that allows you to document and analyze business processes by using templates and shapes that support business process management projects. Track comments by individuals, utilizing the review mode to easily track comments, shapes, and digital ink added by others. Create and use technical diagrams more easily, by taking advantage of numerous enhancements to the database, engineering, network, software and Web diagramming tools. Capture and structure ideas from a brainstorming session, and then export your diagrams to Microsoft Word, Microsoft Excel or XML. Convert a Microsoft Outlook calendar to a Visio calendar that can be richly formatted and easily shared with others.

This CoN recommendation is for Microsoft Office Visio Professional 2003, with no restrictions.

The NETCOM POC is Ms. Kathy Laymon, 520-538-0295, e-mail
